CASTROL LubeCon Series 1/M-0

**ANNUAL SAVINGS: \$4,000 first year
\$10,000 after first year**

THE SITUATION

The OB roller chain did not have a automatic lubrication system in place this was causing the need for annual key stock and chain replacement.

BEFORE

- Without a lubrication system in place the OB chain system required numerous replacements of key stock and chain.
- The key stock and chain were replaced once per year.
- The replacement cost per year to replace this chain was approximately \$10,000.00

AFTER

- The LubeCon system was installed at a cost of \$6,000.00
- With this LubeCon automatic lubrication system in place the chain system has run for one year without the need to replace the key stock and chain.

THE SOLUTION

- It was determined that the OB chain system would benefit from the installation of a automatic lubrication system.
- A lubrication system was designed to meet the needs of the customer.
- The LubeCon system was installed to automatically lubricate the key stock and chains.
- The system is monitored by a qualified Lubecon service technician.

Right product for right application

Experience and knowledge brought together with right products

Continuous monitoring

COST SAVINGS FOR THE FIRST YEAR: \$ 4,000.00
ESTIMATED COST SAVINGS PER YEAR GOING FORWARD: \$10,000.00

IT'S MORE THAN JUST OIL. IT'S LIQUID ENGINEERING.
