### Technical update

Europe is the home to many of the world's finest auto manufacturers who utilize the latest engine technology to maximize power and performance. These engines can generate extreme heat and friction, so they require premium full synthetic lubricants to protect vital components from wear, often calling for specialized oils to meet OEM specifications.

The EDGE® Euro Car range was launched to support the European car parc, with approximately 19 million vehicles currently registered in the US. This range provides 40% better performance against ACEA oil standards and covers 95% of the cars on the road.

EDGE® Euro Car 5W-30 K is being launched to combine the specs of 3 products (5W-30 C3, 5W-30 LL and 5W-30 M) into one fluid. It has been formulated to meet a wide variety of European OEM specifications, including:

- BMW Longlife-04
- Mercedes Benz 229.31, 229.51 and 229.52
- Porsche C30
- Renault RN0700 and RN 0710
- VW 504 00 and 507 00

In addition, EDGE® Euro Car 5W-30 K meets API SP, ACEA C3 and is suitable for use in vehicles requiring VW 505 00 and VW 505 01.

Castrol® EDGE® Euro Car 5W-30 K is scheduled to launch in the United States, Canada, Mexico and CCSA. The target for product launch is early 2022.
