

Bank on better

Unlock savings with Castrol® **Hysol® 11 FF** metalworking fluid – invest in quality and save on price.

Finding the right metalworking fluid for your shop can be complex because you have a wide variety of options, and making sure you choose the right coolant is important. Castrol® can help avoid the costs of getting it wrong. We're a trusted brand recognized for premium quality lubricants and performance.

We're expanding our product range with the introduction of Hysol® 11 FF. It's a coolant for general grinding and machining of ferrous workpieces offered at a price that operations will love and the Castrol® quality your machinists ask for.

If you're seeking performance, rock-solid reputation, and affordable price, speak with your Castrol® local representative about **a free trial of Hysol® 11 FF**. If you're satisfied with the results, we'll give you a **first fill, on us**.

Say "yes" to investing in quality at a great price. Move your business forward with Castrol® and **Bank on better**.

Trial must be completed by September 30, 2024 to qualify for free first fill.

Limited to U.S. customers/machines not currently running Castrol® coolant.

All products and services supplied are provided under Castrol® Industrial's standard conditions of sale. Please consult your local Castrol® expert if you require any further information.
