

Castrol® GTX®

Superior sludge protection
to help extend engine life

Castrol® GTX® Double Action
Formula cleans away old
sludge* and protects against
new sludge formation better
than tough industry standards.

*When tested in engines with high level of sludge

Help extend engine life with Castrol® GTX®

Castrol GTX is one of the world's most trusted engine oils.

It's engineered to protect against problems your customers' engines face every day. Severe driving conditions, like frequent short trips, high temperatures, extensive idling or driving in stop and go traffic, can cause the build-up of a thick, tar-like substance called sludge. Sludge can block an engine's vital oil-ways like cholesterol – and if untreated it can rob an engine of its power and ultimately, its life.

Castrol GTX Double Action Formula cleans away old sludge* and protects against new sludge formation better than tough industry standards.

What are the advantages of Castrol GTX?

- Superior protection against engine sludge**
- Advanced protection against viscosity and thermal breakdown
- Premium quality base oils and anti-wear additives help extend the life of your engine
- Helps minimize oil consumption

Irv Gordon drove a world record
3,000,000 miles using only **1 oil!**

Irv Gordon and Castrol GTX – 3,000,000 miles together

The late Irv Gordon holds the World Record for the highest vehicle mileage in a non-commercial original owner car. When Gordon purchased his Volvo P1800S in 1966, it came factory-filled with Castrol motor oil and Gordon continued to use Castrol for every oil change service for over 49 years. His Volvo, which still has the original engine, never experienced any level of failure despite having been driven a distance equivalent to 120 laps around the world. Learn more at www.castrol.com/IRV.

Castrol GTX is available in SAE grades

5W-20, 5W-30, 10W-30, 10W-40 and 20W-50.

* When tested in engines with high level of sludge

** As measured in the Seq. VG Sludge test
