

Castrol® TRANSMAX® ATF/CVT UNIVERSAL

Unsurpassed coverage of the car parc, superior protection and enhanced durability

Castrol Transmax ATF/CVT Universal is a technologically advanced, full synthetic formulation designed to deliver excellent performance in the vast majority of the traditional stepped automatic transmissions and continuously variable transmissions currently in use.

Durability and performance

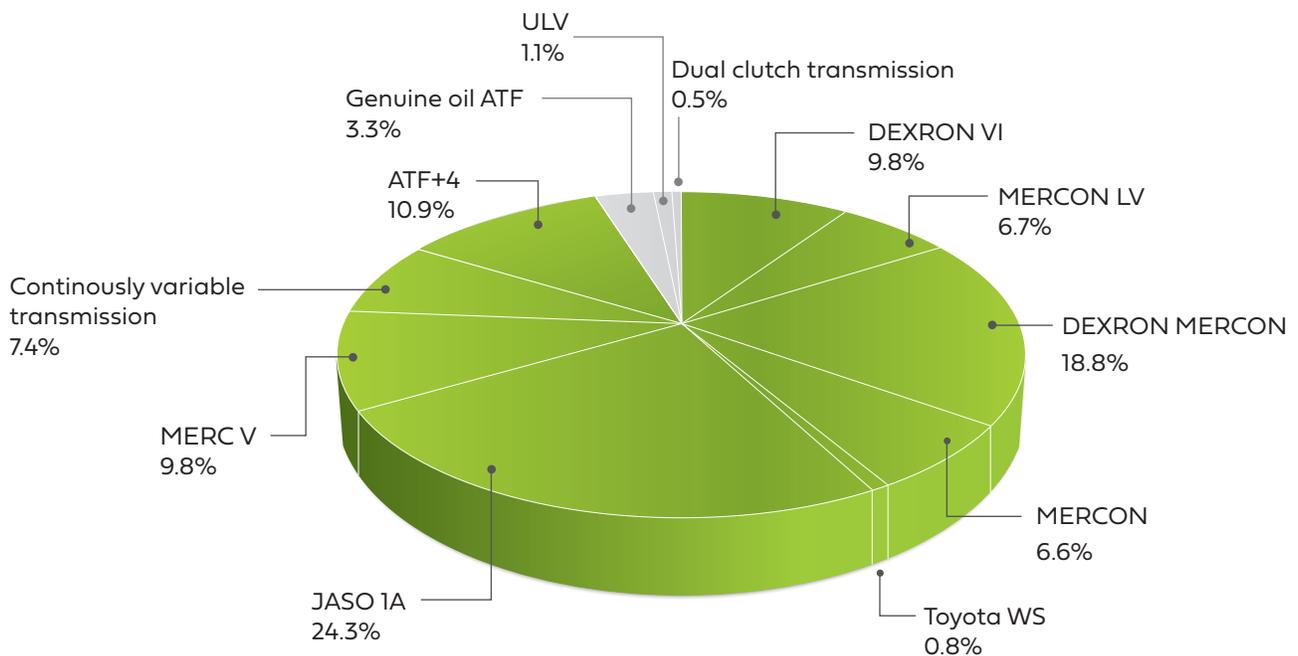

It's formulated with Smooth Drive Technology™, which features active control molecules that automatically adjust their friction level under changing pressures and speed – delivering a smoother drive for longer. The result is enhanced friction durability and smooth transmission performance over a broad range of vehicles. Castrol Transmax ATF/CVT Universal is suitable for use in vehicles manufactured in North and South America, Europe, and Asia.

Advantages

- Broad scope of vehicle applications improves workshop efficiency and inventory management
- Enhanced friction durability for smooth transmission performance
- Superior high temperature protection to effectively resist oxidation
- Unsurpassed protection against copper corrosion

Coverage for over 95% of the vehicles on the road
