

+Preventative +Predictive +Productive

Castrol® has partnered with Intangles™, a predictive maintenance and telematics company, to offer real-time analytics and predictive vehicle health data with service recommendations.

Combined with Castrol's premium products and the predictive ability of Labcheck®, an industry-leading fluid analysis service, we can help fleets to improve reliability and lower costs.

+ Preventative

Castrol Fleet Health includes preventative tools from Labcheck Intelligence.

Castrol Labcheck is a powerful fluid analysis technology that can increase the lifespan of equipment and safely extend drain intervals. Labcheck Intelligence features innovative technology that analyzes fluid samples and provides enhanced flagging, comments, and recommendations.

+ Predictive

Castrol Fleet Health includes predictive tools from Intangles 'digital twin' connected technology.

You can protect your fleet's health with the Intangles analytics platform. This integrated hardware and software solution utilizes 'digital twin' technology to predict component-level problems, causes, symptoms and repair strategies.

+ Productive

Castrol Fleet Health includes productive tools such as InRoute Connect.

By helping predict and prevent problems – both in-route and in the workshop – we can enable your fleet to become more reliable and more productive, by improving turnaround times, cutting unplanned costs and minimizing downtime.

Intangles trial results

Refuse

Intangles' fleet maintenance system successfully identified and prevented engine faults in 30% of a municipality's CNG refuse vehicles during a pilot program. This proactive approach saved the municipality significant costs in repairs, parts, and towing, while also improving fuel economy.

As a result, the municipality has expanded the use of Intangles to its entire fleet.

On-road trucking

Intangles' fleet maintenance system successfully identified and prevented engine faults in 37% of a truck fleet in a pilot program. This proactive approach saved the fleet significant costs in repairs, parts, and fuel, while also improving fuel efficiency.

As a result, the fleet manager has expanded the use of Intangles throughout the entire fleet (six different OEMs).

If you want to become more Preventative, Predictive and Productive, talk to Castrol, and we'll help you operate the fleet of the future, today.
